

Located in Stuttgart, STORDIS GmbH is one of Europe's leading companies in the field of "Open Networking" and specialised in developing innovative, tailor-made networking solutions. Our primary customers are renowned enterprises operating in academia and research, media and entertainment, cyber security, telecommunication, financial services, defence, and service providers.

We run first-class laboratories fully equipped with the most recent open networking technology and develop individual software and hardware solutions in our two facilities in Germany and the United Kingdom. We are highly committed to promoting the "Open Networking Revolution" with the help of our international memberships.

As a result of positive progress, we are expanding and we are looking for a motivated new team member in the position of:

Network Systems Engineer

As our network systems engineer you are responsible for the development and the implementation of complex network solutions and manage functional support to prospective clients and customers according to their requirements. You act consultatively, identify potential for improvement, design network infrastructures and manage the deployment on-site.

Your upcoming tasks:

- You develop and optimise network infrastructures for notable companies worldwide
- You design integrated network environments based on open networking technology
- You assure functionality of the combination of hardware, software and services to meet complex customer requirements
- You manage and perform on-site deployment services
- Maintain customer relationships and continuously deliver advice to identify requirements and additional opportunities
- You provide consultative advice to our technical team and work closely with our software development department
- Use in-depth product knowledge and technical expertise to assist our sales staff in meeting customers' needs to drive additional revenue
- You provide specific technical support as well as customised solutions
- You are attending leading international exhibitions

Skills and Qualifications:

- A minimum of 3 years related experience with University degree, or equivalent work experience
- A profound knowledge of infrastructure engineering and practical experience
- Strong language skills in German and English
- Must be customer focused and have the ability to establish solutions to complex technical issues
- The ability to work both independently and as part of a team, in a well structured manner

What we offer:

- A permanent position in a future-oriented company
- Tasks of diverse complexity and scope in an innovative environment
- Excellent career building opportunities such as internal training and advanced education
- A versatile and highly technologically equipped test lab
- Flat hierarchies and an international environment
- Optional flexible working hours
- Optional activities such as barbecues and corporate events.
- A strong appreciation of your personality and reliance in your experience and competencies

Your next step:

Are you ready to shape the future of networking technology with us? Great! Please send your applications to jobs@stordis.com. Please kindly provide your earliest possible entry date and your salary expectations. Your personal information will be treated as strictly confidential.

STORDIS values equal opportunity and considers qualified applicants for employment without regard to gender, age or national origin
