

STORDIS is one of Europe's leading companies for innovative network technologies such as 'Open Networking'. Our customers are international corporations, public institutions and leading companies within the telecommunication, security, finance, and broadcast industry. At our headquarter in Stuttgart, Germany, and at our office in London, we develop our own software solutions and drive innovations forward within the market.

As a result of positive progress, we are expanding and our international software development department is looking for an experienced new team member in the position of:

Software Developer: Network Controller

As a member of our software development team you will design and create tailor-made software applications and get involved in the customer discourse to understand the requirements. You will act consultatively, identify potential for improvement, and manage the implementation on-site.

What you'll be doing:

- Design and develop software for networking applications
- Develop and automate test cases and create proofs of concept
- Visit our customers' facilities for demonstrations, trainings or to identify the requirements
- Research and deploy new technologies as per project demand
- Help improve the development and the testing procedures with your technical expertise
- You are attending leading international exhibitions

Skills and Qualifications:

- Completed training in Computer Science, Informatics or equivalent education
- Professional experience in software developing or open source
- Expertise in a minimum of two programming languages such as Java (Java 8 is preferred) and Python; knowledge of P4 is big plus
- Profound knowledge of networking protocols
- Experience working in Linux environments
- Familiar with Agile Methodologies and test driven development (e.g. Mockito, JUNIT, GIT, Maven)
- Knowledge of deployment containers such as Karaf and OSGi frameworks is beneficial
- Experience in working with SDN controllers such as OpenDaylight and ONOS is beneficial
- Excellent communication skills in English
- A self-driven personality, eager to learn new technologies and able to manage multiple responsibilities as per project demand
- Strong communication, teamwork and problem-solving skills are essential

What we offer:

- A permanent position in a future-oriented company with more than 10 years' experience
- An attractive salary and flexible working hours
- A unique, versatile test lab equipped with the latest technology
- The opportunity to experiment and explore and to be involved in the companies advancements
- Excellent career-building opportunities such as internal training and advanced education
- Tasks of diverse complexity and scope in an innovative environment
- A strong appreciation of your personality and reliance in your experience and competencies
- Flat hierarchies and an international environment
- Voluntary after-work activities such as barbecues and corporate events

Your next step:

Are you ready to shape the future of networking technology with us? Great! Please send your applications to jobs@stordis.com. Please kindly provide your earliest possible start date and your salary expectations. Your personal information will be treated as strictly confidential.

STORDIS is an equal opportunities employer and will consider qualified applicants for employment without regard to gender, age or national origin.
